Evaluating the NEW Geometro Manual and Workbook!

Attention all teachers who have used (or would love to use) Geometro with their elementary students!! You have asked and APH has listened. APH is now working to bring to you a Teacher's Manual, a tactile Student Workbook, and a set of manipulatives as a supplement to the very popular Geometro. Now field evaluators are needed!

The Teacher's Manual provides background and supporting information for using Geometro, while the tactile Student Workbook and manipulatives include activities to help your students better understand geometric concepts. We are specifically looking for teachers of students who are blind or visually impaired, in grades 1-6, who are learning about geometry.

Evaluators will be provided with the Teacher's Manual, Student Workbook, and a set of manipulatives. Evaluators must have their own Geometro tiles with the following shapes: triangles, squares, pentagons, hexagons, rectangles, and isosceles triangles.

The evaluation period will begin March 1, 2012 and run approximately 6 weeks. If you would like to be considered for participation, please contact Sandi Baker at sbaker@aph.org.

Please feel free to forward or circulate this request to teachers who might be helpful to this evaluation. Thank you!

Start Now! Get ready to enter APH InSights Art Competition 2012

Visually impaired or blind artists of all ages are invited to submit artwork for our twenty-first annual international art competition, APH InSights 2012.

Last year, nearly 400 entries were received. From these, jurors selected 83 pieces for the exhibition, which was shown in Louisville at the Annual Meeting last October. From the 83 works selected for display, 22 award winners were chosen and 13 of them came to Louisville to receive their awards in person at the annual meeting.

Artists may enter original artwork created in any medium, including (but not limited to) painting, drawing, printmaking, fiber, metal, or wood.

The deadline for entries from students in kindergarten through high school is **March 26**. Adult artists have until **April 2** to send in their entries.

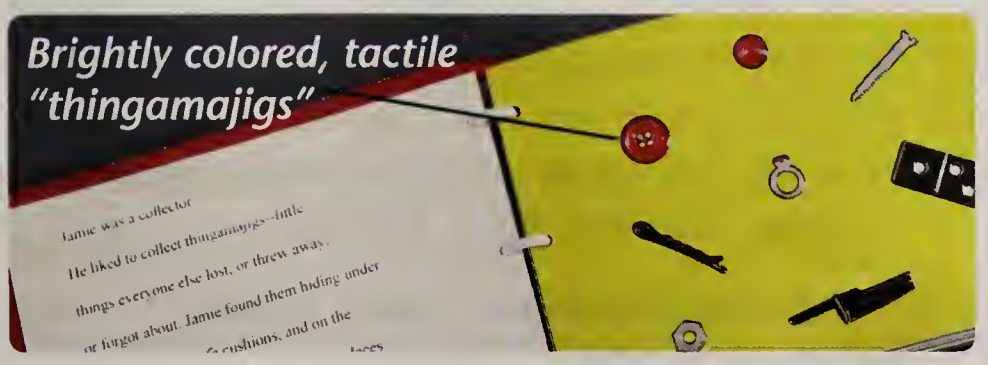
Sample On the Way Book



Thingamajig ***(Book with Thermoforms)***

Alphabet Scramble Storybook

A read-aloud storybook promoting emergent and early literacy skills. The rhyming story tells of a "family" of alphabet letters as each sets out to explore the page. As each letter takes a turn crossing the page–shown as a line of repeating letters–the child has the motivation to track along the line of braille, gaining skill in the hand movements used for braille reading.

5-01199-00.....$46.00

Optional *Alphabet Scramble, Notes to Reader,* **Braille: 5-01198-00.....$8.50**

Moving Ahead Series

A follow-up to APH's On the Way to Literacy Series, Moving Ahead storybooks introduce symbolic representation, more complex illustrations, and an increased emphasis on text. Each storybook, ***Goin' on a Bear Hunt***, ***Splish the Fish***, and ***The Boy and the Wolf***, includes a Large Print *Reader's Guide* (braille edition sold separately) that contains general information, tips on using the storybook, and additional resources. Also included are braille words on customer-applied labels, allowing the reader to choose contracted or uncontracted braille.

Goin' on a Bear Hunt

This is the first title in the series. In the process of hunting for the bear, the reader follows a tactile line through the story, and at the end of the book is a fold-out tactile "map" to use in retelling the story.

Recommended ages: Pre-K to 3rd grade.

Print/Braille Book with Large Print *Reader's Guide*: 6-77903-00.....$45.50

Optional *Reader's Guide*, **Braille: 6-77907-00.....$10.00**

Splish the Fish

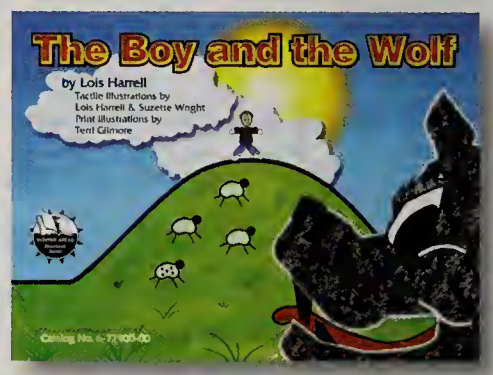
The second title in the storybook series is a read-aloud rhyming story that features simple raised-line symbols representing Splish and his friends embedded in an areal pattern representing the ocean. The child tactually searches for Splish and helps him find his way back to his friends. An accompanying storyboard with Velcro®-backed pieces permits the child to retell the story.

Recommended ages: Pre-K to Kindergarten.

***Splish the Fish* Print/Braille Book with Large Print *Reader's Guide*: 6-77902-00.....$56.00**

Optional *Splish Reader's Guide*, **Braille: 6-77906-00.....$11.00**

New! *The Boy and the Wolf*



This rhyming story features a twist on the tale of the boy who cried wolf. Simple raised line symbols represent the Wolf, the Boy, and his flock of sheep. As the story is read, the child is invited to tactually search the page for these characters, to count and compare like and different pairs of sheep, and notice differing orientations. Introduces a variety of concepts: left, right, top, bottom, near, far, first, last. Includes a storyboard and symbols, which permit the child to create his or her own tactile displays.

Recommended ages: Preschool through 2nd grade.

Print/Braille Book w/Large Print *Reader's Guide*: 6-77900-00.....$50.00

Optional *Reader's Guide*, **Braille: 6-77904-00.....$18.25**

Selected Recreational Reading Books from APH

APH offers recreational reading books in enlarged print, large print, and braille. This section lists a few of our hundreds of titles. For more titles, go to **http://shop.aph.org** – books can be searched by author or title. New recreational reading titles are announced in the monthly online newsletter ***APH News***.

All books are produced upon receipt of orders, therefore, please allow several weeks for delivery.

New! *Experiential Learning: Activities for Concept Development*

Addresses six of the primary areas that need to be promoted in infants and young children with visual impairments.

Development areas:

- Cause and effect
- Hand-eye coordination
- Auditory-hand coordination
- Motor development
- Object permanence
- Sensory awareness
- Spatial awareness

Each section of *Experiential Learning* contains a brief overview of the skill or concept being addressed. This overview is followed by three suggested activities: a beginning, intermediate, and more advanced activity for each area.

User provides toys

The service provider or parent must provide the toys and other materials to be used in each activity. A list of suggested materials/items suitable for the activities are provided in the back of the guidebook.

Recommended ages: while this product is designed for children ages birth to 3, who are blind and visually impaired, the activities are also appropriate for children of any age working on the six developmental areas.

The included CD-ROM disc contains .brl and html accessible formats of the guidebook.

Rolling Into Place™

Although *Rolling Into Place* is an interactive storybook intended primarily for children with visual impairments, any young child can enjoy its unique, fun design. As the Velcro® ball is rolled to its final "surprise" destination, important hand skills and basic directional concepts are learned and reinforced. The book's simultaneous visual, tactile, and auditory feedback help the child attend to the path traveled by the ball. Also included are an assortment of interactive Velcro face pieces and suggested activities.

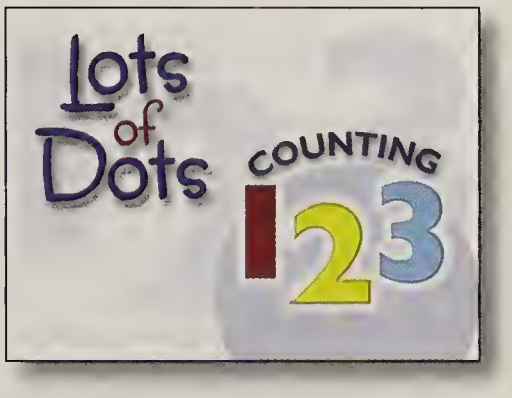
Lots of Dots: Counting 1 2 3

This book presents numbers 0-30 and then integers of 10 up to 90.



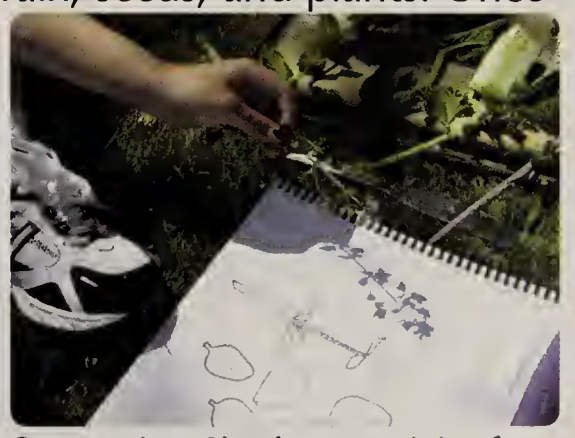
Attached to the inside front cover is a plastic stencil of three large braille cells. This can be folded over the blank pages, allowing the child to practice the braille cell for the number by tracing or by using the accompanying foam braille chips. This book uses uncontracted braille.

Recommended ages: Pre-K and up.

***Lots of Dots: Counting 1 2 3*: 1-10001-00.....$32.00**

Lots of Dots: Coloring the Garden

This book presents a variety of fruits, vegetables, and herbs, and introduces picture building. The book begins with an empty garden. Each page adds a new feature, i.e., clouds, rain, seeds, and plants. Once the garden has grown, a new garden item is introduced on each page for the child to color. The enrichment activities are simple recipes that the child and parents/siblings/teachers can do together. The activities present daily living skills, such as planting, organizing, and food preparation.



Comparing Shadows activity from Lots of Dots: Coloring the Garden

This book uses uncontracted and contracted braille, where applicable.

Recommended ages: Preschool and up.

New! *The Best for a Nest Interactive Storybook*

This large/print braille book includes color illustrations on each page that depict the text. *The Best for a Nest* interactive storybook provides an opportunity for the learner to focus on many concepts: position of objects, prepositional phrases, and use of tactile symbols.

Use of Storyboard

The storyboard should be removed from the book so the child can use the included tactile symbol manipulatives to illustrate what is happening on each page of the book. The child may need assistance when first placing tactile symbols on the storyboard. It is anticipated that the child will need less assistance as he/she gains experience. Make this experience fun and meaningful for the child.

Manipulatives

Included with the book is a group of manipulatives: birds, nest, eggs, tree, branches, grass, and a cat. The manipulatives are tactile symbols that are designed to assist the child in better understanding the text.

Basic Concepts Can Be Explored

- Counting – the number of branches, eggs, birds, nest, and cat
- Left and Right – as related to the tree, its branches, and positions of the bird(s), and cat
- Comparisons – of lengths of branches and sizes of birds
- Top and Bottom – of the tree and the page
- Around – the tree

Topics for Discussion

- Why do birds sit on their eggs?
- Where do birds go when winter comes?
- What are the seasons of the year (sequence) and their difference?
- Why did the bird want to be safe from the cat?
- What kind of food did the bird find on the ground?

Recommended ages: 2 years and up.

The Best for a Nest: **5-12301-00.....$75.00**

WARNING: Choking Hazard — Small Parts. Not intended for children ages 5 and under without adult supervision.

Included storyboard with manipulatives.

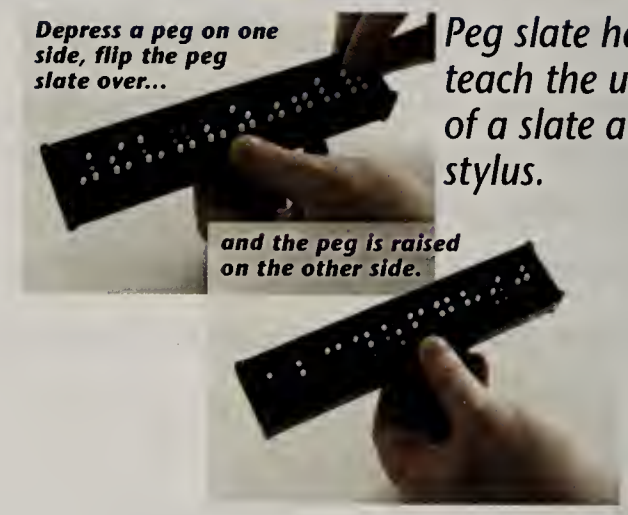
Peg Slate

A paperless device designed to help teach beginning users of the braille slate. A frame is mounted with pegs that represent the braille dots in 10 braille cells. A finger is used to push the pegs down. The frame is then flipped over to read the braille message. Made of black plastic with white plastic pegs for high contrast. Instructions in print and braille.

Recommended ages: 6 years to adult.

Peg Slate: 1-08830-00.....$16.00



Peg slate helps teach the use of a slate and stylus.

Quick Pick Braille Contractions

Includes two cases of 50 cards with each case representing a cross-section of braille contractions. On both sides of the cards, a braille contraction is on the top and four uncontracted answer choices are across the bottom.

To play, read the contraction, pick the uncontracted choice that matches, put the wooden tool in the corresponding hole for the answer, and try to pull the card out of the case. If the card slides out, the answer is correct. If incorrect, the card will not slide out – "Quick Pick" as many cards as possible!

Geometro

Provide hands-on experience with manipulatives that aid in teaching 3-D geometry. Geometro models are flat plastic shapes – triangles, squares, pentagons, and hexagons – that can be readily joined to form three-dimensional solids. The pieces use Velcro® material to adhere to each other and are easy to handle, sturdy, and safe. Even the youngest learners quickly master them.

Geometro GS16 Mini Set: 1-03022-00.....$89.00

Note: Other Geometro sets are also available.

Mini Set includes 16 pieces: 8 triangles, 6 squares, and 2 pentagons.

New! Geometro Shapes

Optional sets can be purchased in addition to the Geometro kits. These shapes can be combined with the main Geometro kits to create additional 3-D solids.

Multiplication and Division Table Kit

Large print/braille tool helps math students with multiplication and division problems. The chart is printed/embossed on white index stock and is punched for a 3-ring binder. Alternating rows are highlighted to help low vision students easily track numbers. The Multiplication/Division Table Kit has been expanded so students can find the products of two whole numbers from 1–10 or the quotient of a related division problem.

Quick Pick Math

Math game consisting of a large plastic packet containing fifty large print/braille cards. The front and back of each card contains a math question and four possible answers.

To play, a student inserts the included tool in one of four holes in the front of the plastic packet. If the answer is correct, the card will slide out. If the answer is incorrect, the card will not pull out, and the student should try again.

Recommended ages: 5 years and up.

Subtraction: 1-03571-00.....$35.00
Multiplication: 1-03572-00.....$35.00
Division: 1-03573-00.....$35.00

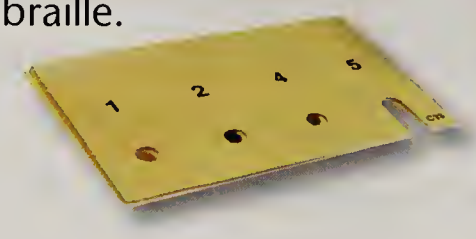
Quick Pick Counting

This game is designed to help young children learn to count to 12 with raised-line symbols and braille numbers. Can also be used with developmentally delayed students.

Game includes fifty one-sided game cards in a plastic packet and is played as described above in Quick Pick Math. The student counts the tactile symbols and then reads the correct braille number. The raised-line symbols are embossed only, the number answers are large print/braille.

Recommended ages: 4 years and up.

Quick Pick Counting: 1-03574-00.....$32.00



Braille/Large Print Protractor

Bold large print numbers and raised dots mark the 180 degrees of this protractor. This revised model has markings every 5 degrees rather than every 1/2 degree. The lines are bolder and the type is 18 point.

Protractor features a pivoting wand. Includes print and braille instructions.

Braille/Large Print Protractor: 1-04115-00.....$14.00

Large Print and Tactile Protractors

Use the same convenient measuring tools in both classroom and assessment situations.

Both protractors feature:

- Lightweight, clear plastic
- Movable, transparent yellow wand
- 6-inch ruler at bottom edge
- Open hole where a wand is attached for inserting pencil or push pin at vertex of angle
- Notches at bottom left and right allow for pinning to a surface

Large Print Protractor

- Bold, sans serif, 20-point font
- Upper labels mark every 10 degrees from 0° to 180°
- Lower labels mark every 20 degrees from 180° to 0°

Large Print Protractor (4-pack): 1-04116-00.....$23.00

Tactile Protractor

- Braille dot markings on upper edge
- 3 braille dots at 0°, 45°, 90°, 135°, 180°
- 2 braille dots at each 10° to 170° except 90°
- A single braille dot at every 10° increment from 5° to 175°, excluding 45° and 135°

Tactile Protractor (4-pack): 1-04117-00.....$25.00

StackUps: Spatial Reasoning Using Cubes and Isometric Drawings

Abacus Basic Competency: A Counting Method

An instruction manual to teach children and adults abacus skills in the four basic math operations. This abacus instructional system uses the Counting Method instead of the traditional indirect method.

Advantages include:

- Simple method comparable to the way young sighted children count and add by counting things one at a time, as in counting on fingers.
- Minimum number of rules must be learned.
- Speed in using the abacus is not lessened with this method. Accuracy is increased, frustration is eliminated.

New! APH Talking PC Maps Software

This software provides spoken and on-screen map data and 12 million points of interest for U.S. states, territories, and Canada on one flash drive. It speaks on any Windows® computer, whether or not the computer has screen reading software installed. APH Talking PC Maps is a joint venture of APH and the Sendero Group LLC.

APH Talking PC Maps software does not give information about a user's actual physical location; it is not a GPS system. Instead, it provides a verbal description of physical space and what it contains. It gives persons with visual impairments the same information available to sighted persons through incidental learning when they look at maps, street signs, and signage on buildings.

This software helps your student:

- Virtually explore streets and learn their layout
- Set a destination and track the distance and compass heading to that destination
- Save, reverse, review, and print or emboss pedestrian or vehicle routes
- Track the side of the street that he or she is virtually walking on, and make realistic decisions about turns and street crossings
- Record or type custom descriptive information about a particular intersection, parking lot, building, or other location

Example Uses of APH Talking PC Maps software:

- **O&M Learning Tool: Learn a new part of town:** your O&M student can learn about the part of town to which his family will be moving.
- **Classroom Map Study Tool: Explore Washington, DC:** your sixth grade student can be included in the classroom's virtual tour of Washington DC.
- **Incidental Environmental Learning and Location Literacy Tool: Locate a business for occupational interviews:** your eleventh grade rehabilitation consumer can locate and interview members of ten occupations with which he is not familiar.

APH Talking PC Maps software, along with a User's Guide, is delivered on a USB flash drive. Technology-savvy students and adults can use this software with little assistance. Other students may need some instruction in its use.

Lamp uses a special 27 watt, 2700K, compact fluorescent tube which emits no blue or ultraviolet light. ***Lamp is not available separately.***

New! *Lighting Guide Kit* Video

In this Homegrown Series DVD, APH Low Vision Project Leader Elaine Kitchel discusses the research behind the development of the Better Vision Lamp and APH's commitment to provide the best light possible for students with visual impairments.

Elaine and other Lighting Guide Kit users discuss the types of tasks they enjoy while using the lamp – from doing homework, completing reading assignments and paying the bills, to hooking a rug, making jewelry, and looking at photos – as well as some of the benefits, like less eye fatigue and being able to work longer and more efficiently.

Runs approximately 19 minutes. Closed Captioned.

MiniBook Braille Quick-Note Products

Jot down small bits of information quickly! When a friend gives you a phone number or a clerk tells you the total of your debit card purchase, you need to get to your braille writing materials *fast*!

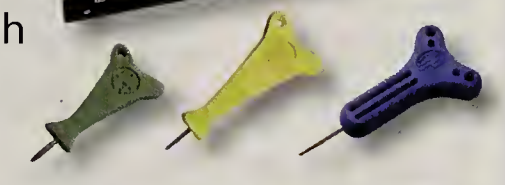
APH's MiniBook gives braille users the ability to get materials out and ready to write as quickly as their sighted peers. Pull the MiniBook braille binder or spiral notebook out of your pocket and begin to write on the MiniBook Slate in just a few seconds!

A few things that you can do with MiniBook materials:

- Use your Binder for material that changes; you can easily remove, rearrange, and replace pages.
- Arrange appointment dates in your Binder and insert pages when you make new appointments.
- Keep a Mini Spiral Notebook, Slate, and Stylus by the phone to jot down quick messages.
- Use one Mini Spiral Notebook for each purpose: for example, one for your to-do list, and another for phone numbers.

Materials are sold separately:

- **MiniBook Slate with Styluses:** This tiny slate has four lines, 15 cells per line. The cells have side indentations, making it easy to find the dot you want to make. It comes with three styluses: saddle, tall flat, and short flat. Choose the one that fits your hand most comfortably.



- **Six Ring Binder for MiniBook:** This tiny six-ring binder comes with a pack of 250 sheets of punched filler paper. It fits into a pants or shirt pocket. Keep the slate fastened to the first blank page, keep a stylus in the binder's back pocket, and be ready to write in an instant. You can open the rings to rearrange pages or add new ones. The binder will hold up to 50 pages of braille.

- **Filler Paper for MiniBook:** Additional packs of filler paper can be purchased for the binder.

- **Mini Spiral Notebook (2-pk.):** Even smaller than the binder, the Mini Spiral Notebook includes 50 pages perforated for easy removal. Fasten the slate to the first blank page, then when you pull the notebook out of your pocket, you're ready to write!

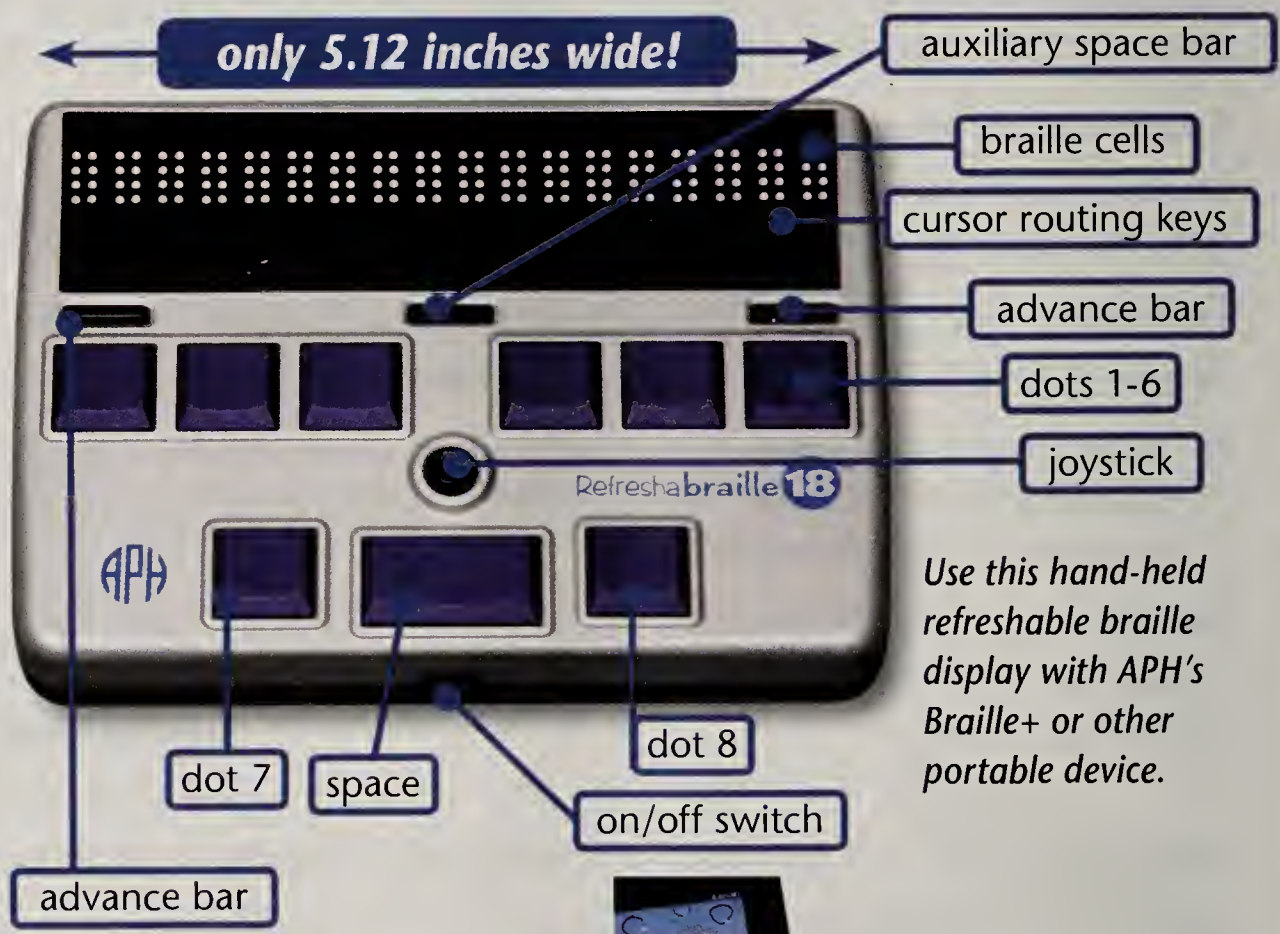
Access Other Equipment

Refreshabraille is a device designed to be used with other equipment. It provides the screen and keyboard for that other device. Whether that device is a cell phone, PC, or tablet, every effort has been made to make the process simple and reliable. The device must have software that has the ability to communicate with the Refreshabraille. In the case of your PC, that software is the screen reader program, like JAWS or Window-Eyes. For phones and off-the-shelf PDAs, screen reader software like Mobile Speak or Talks is required. Accessible devices like Icon and APH's Braille+ already have software (as of version 2.0) that integrates with the display.



Use this hand-held refreshable braille display with APH's Braille+ or other portable device.

Refreshabraille connected via bluetooth to a tablet.

Verbal View™ Software Tutorials

New!

Verbal View™ of Office Ribbon Bar®

The programs in the Microsoft Office® 2007 Suite work better together because they now share a common file format and a common user interface. The interface is called the "Ribbon," and it has been the source of frustration to many blind computer users. With the information in this tutorial, the blind user will understand and confidently interact with this important new interface.

Offered on your choice of either a CD-ROM or a National Library Service (NLS) Player-compatible flash cartridge, this tutorial comes in multiple digital formats including DAISY, html, Microsoft Word®, and text.

The DAISY version plays on any Digital Talking Book player that supports DAISY 3.0 including APH's Book Port™ Plus, BookSense, Pocket, Victor Reader® Stream, and the National Library Service DTB player. The CD includes a DAISY reading program, APH's Book Wizard Reader®, that you may use to read the book on a Windows PC.

For more information about the National Library Services digital talking book player, please visit **http://www.loc.gov/nls/digital.html**

Verbal View™ of Windows® XP

Learn to use Windows XP with this comprehensive tutorial designed for students and professionals. Unlike most computer tutorials which assume a familiarity with Windows graphics and mouse techniques, Verbal View of Windows XP is written for the keyboard user who is blind and visually impaired. This tutorial comes on CD-ROM.

Verbal View of Windows XP: D-10500-00.....$50.00

Verbal View™ of Vista®

A comprehensive tutorial on using Microsoft Windows Vista from the viewpoint of a blind or partially sighted student or professional. It covers nearly every aspect of Windows Vista, and presents this material from the keyboard user's perspective.

Basic knowledge of Windows is required. This tutorial comes on CD-ROM in DAISY 3.0 full-text, full-audio format, and also includes versions in Microsoft Word®, HTML, contracted braille, and a text file.

Verbal View of Vista: D-10517-00.....$50.00

Verbal View™ of Word® and Verbal View™ of Word® Advanced

Verbal View of Word takes special care to focus on aspects of Microsoft Word that are not obvious to the blind user from the normal Word documentation. Instead of focusing on the mouse and visual cues, this tutorial lets the user know how the keyboard and screen reader can be used to accomplish word processing tasks efficiently and elegantly.

Verbal View of Word Advanced goes beyond the basics and gives the blind writer the tools needed to perform nearly any editing, collaboration, or publishing task with Microsoft Word.

Brianna with a Rib-It-Ball.
See next page.

Web Chase

An originally designed board game by APH that is intended to develop important tactile skills within a fun, recreational context. As players navigate their hungry spiders through an insect-laden web, they learn to trace various raised lines, identify point symbols, and discriminate textures and shapes (of various prey).

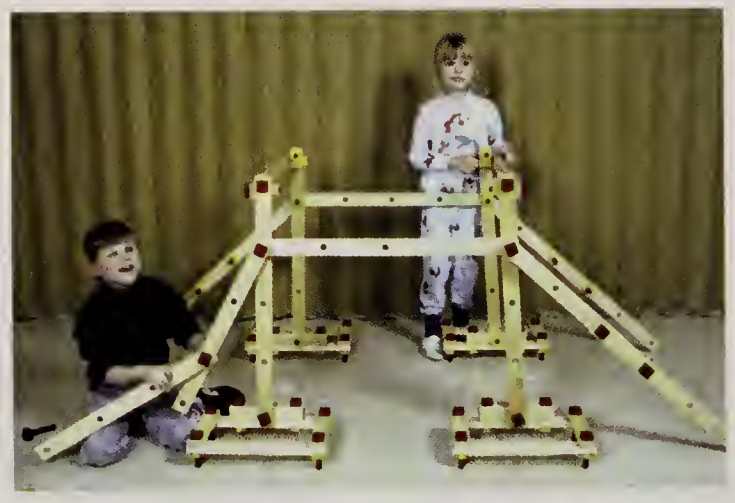
Web Chase's combined visual and tactile presentation makes it accessible to all players regardless of visual ability.

Recommended ages: 5 years and up.

1-08460-00.....$210.00

Note: *One-time application of Velcro® coins to the game board and lunch trays is required by customer.*

WARNING: Choking Hazard — Small Parts. Not intended for children ages 5 and under without adult supervision.



Wooden Constructo Sets

Choose from two sets that help children to develop creativity, problem solving skills, muscular coordination, manual dexterity, and construction concepts. Construct all types of structures using various lengths of hardwood which have been drilled with holes. Lengths are linked together with color-coded nuts and bolts.

Recommended ages: 4 years and up.

Swirly Mat™ Sets

Durable, non-toxic Swirly Mats come in two sets: **Cortical Visual Impairment (CVI)** and **Functional Vision Assessment (FVA)**. The mats in the CVI set are less complex and are designed for students with cortical vision impairments. The mats in the FVA set are more complex and are useful for conducting functional vision assessments. Both mats can be used for locating, tracking, color discrimination, etc. Try them with APH's Mini-Lite Box (sold separately) for a different effect. Each set includes white background mat, print and braille instructions, and a plastic carrying case.

Note: *Always provide supervision when using Swirly Mats with young children. Mats are completely sealed; however, in the event of a rupture, small pieces inside the mats may be a choking hazard. Liquids are non-toxic but will stain. Use caution.*

Mini-Lite Box

APH's Mini-Lite Box is smaller, lighter, and more affordable than its full-size cousin, the Light Box. The Mini-Lite box is usable at a student's desk or on his/her lap. Individual items from Light Box Materials Levels I, II, and III can be used with the Mini-Lite Box.

Features:

- Dimming control
- Built-in combination handle/tilting stand with 11 positioning angles
- Child safe case
- Low battery audio signal
- Ledges hold overlays in place
- Operates 3-4 hours on included rechargeable batteries or can be plugged in with included AC adapter

An optional Mini-Lite Box Carrying Case is available. It is made of a tough canvas-like nylon and has roomy pockets to hold overlays and other materials.

Also available separately are Mini-Lite Box Transparent Overlays. Set includes one clear, four color, and a sheet of clear, flexible plastic. The color overlays may be used to promote light awareness; improve contrast and visibility; and introduce color matching. The clear overlay may be used with black and color markers. The flexible overlay offers a slip-resistant surface for acrylic materials.

Scattered Crowns: Tactile Attribute Game

A fun, versatile board game that encourages young children, especially those with visual impairments or blindness, to develop tactile skills. As players search for crowns with specific attributes: band texture (smooth, rough, or striped), number of jewels (1, 2, or 3), and number of points (3, 4, or 5), they will practice:

- Texture/shape/size discrimination
- Tactile memory
- Systematic searching skills
- Spatial concepts

Other concepts and skills practiced during game play include counting skills, turn-taking, sorting/organizing, and social interaction skills. The game is conducive to playing classic "concentration" games using the crown pieces or user-constructed matching game pieces (e.g., basic shapes, braille words/letters, etc.).

Recommended ages: 5 years and up.

Sudoku Partner 6x6

Sudoku Partner 6x6 is a portable, reusable board for setting up and solving 6x6 sudoku puzzles. Its advantage over other sudoku solving boards is that it allows you to mark possible answers in each box to help you keep track of them, without hundreds of separate pieces. It is also useful for those who don't know braille but still want a tactile system for solving the puzzles.

Like a standard print sudoku puzzle, the board has an array of small and large rectangles. Each *block* (large rectangle) is made up of six *boxes* (small rectangles)—three boxes across and two boxes high. Tactually, the boxes are outlined in smooth raised lines and the blocks in heavier dashed lines.

It is especially important to make sure students can track left to right, up and down, and at the same time look for information tactually. Building success through gradual steps should keep the activity enjoyable for students.

Includes:

- Two puzzle-solving boards
- Booklets with rules, examples, and puzzles in print and braille
- 150 puzzles provided with answers, at three difficulty levels

Recommended ages: 10 years and up.

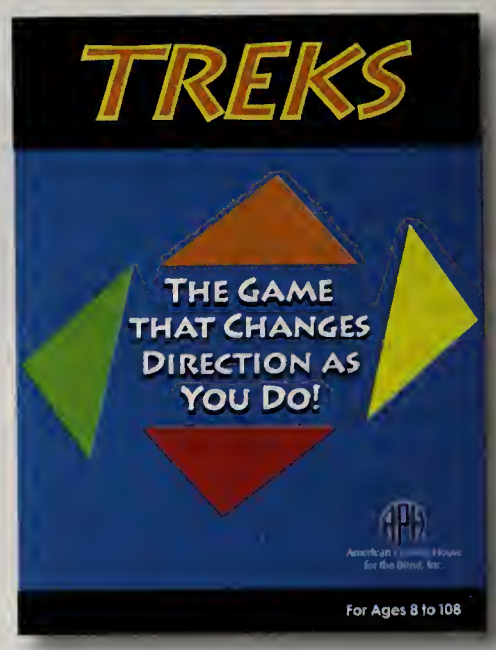
TREKS: The Game of Compass Directions



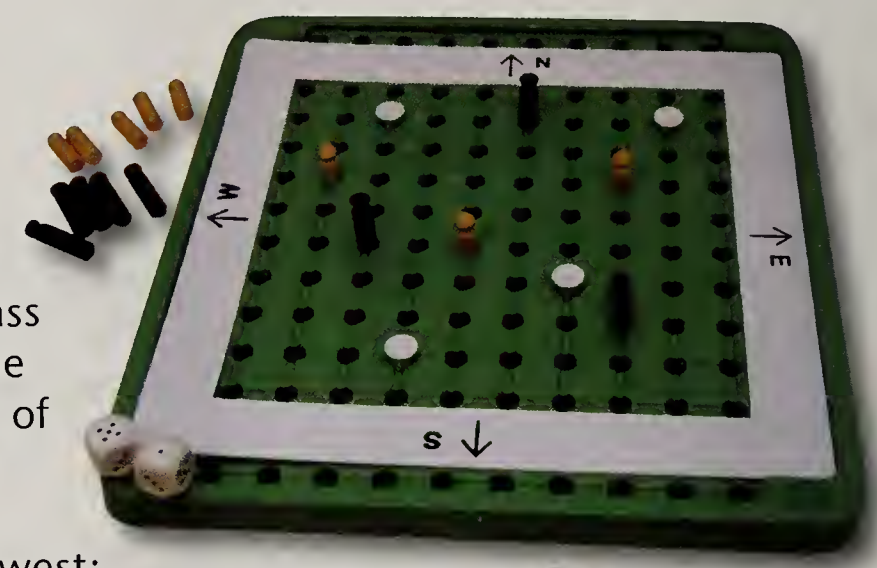
Designed to be challenging, educational, and enjoyable. Like a good walk outdoors, it's full of variety!

The goal of the game is to be the first player to move your pieces ("treksters") across the board from your home row into the opponent's home row. You can change the game to make the play simpler or add rules to make it more complex.

After each move, you must announce the direction and the number of spaces moved by each trekster. For example, "I moved this trekster four spaces east and this trekster one to the south." If you forget to make this announcement, your opponent may undo your move!

Includes print/braille overlays and pieces to use for varying the basic game:

- One overlay with the four cardinal directions labeled and another with only a north arrow.
- One overlay with numbered and named streets. With this game variation, you are required to name the starting and ending intersection for each move rather than the compass direction, as in "Moving from Third and Bay to Third and Fox" or "Moving from Second and Hart to Seventh and Hart."
- Buttons that serve as barriers to navigate.
- One overlay with the cardinal compass directions at the four corners of the square. By keeping the movement rules the same, you force all moves to be in secondary compass directions with this overlay. For example, if the north arrow is placed in the upper left corner of the board (from your vantage point), moving a trekster straight ahead is a move to the northeast; moving to the left is a move northwest; and so on.
- Two blank overlays (one that is open in the middle, one with two intersecting bands inside) to which you can add braille stickers to represent street names, street numbers, blocks, landmarks, lines of latitude/longitude, etc.



Along with the pieces mentioned above, the kit includes a game board, treksters that are tactually and visually contrasting, a rules and variations booklet in large print and braille, and a set of tactile dice.

Recommended ages: 8 years and up.

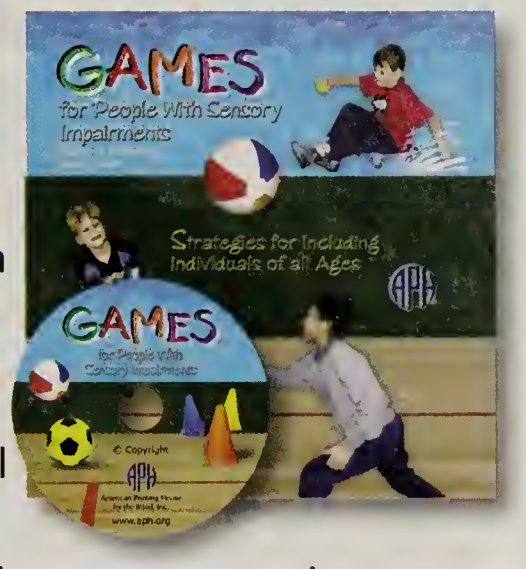
New! GAMES for People with Sensory Impairments



Physical education teachers and activity/recreation directors find *GAMES for People With Sensory Impairments: Strategies for Including Individuals of all Ages* to be practical, relevant, and realistic. Adapted Physical Education (APE) professors find it to be a valuable tool when teaching future APE teachers. For novices, this publication provides a wealth of information on what to do, how to do it, and why. The authors, Lauren Lieberman and James Cowart, draw on their extensive experience in teaching students of all ages who have visual impairments, blindness, deafblindness, and multiple disabilities.

The book's Game Finder helps teachers locate games and activities that are appropriate for their students. The Game Finder Key identifies each game by name, category, sport skill, physical and motor fitness, and fundamental motor patterns and skills. The games and activities included in the book are creative innovations submitted by 15 outstanding teachers, coaches, and leaders who work in schools or programs for students who have sensory impairments.

The binder allows game pages to be removed for easy use in the gym, on the field, or pool side. The game pages are printed on heavier paper stock to accommodate frequent handling. Both the large print and braille versions contain a CD-ROM with an .html file.

History in the Making: The Story of the American Printing House for the Blind, 1858-2008

A richly illustrated book celebrating the 150th anniversary of APH, *History in the Making* explores how an organization with one printing press in borrowed space in a school basement grew to occupy most of a city block and became a national icon for generations of students, teachers, and adult consumers.

Regular Print Edition:
Packed with rare details about the origins of APH, this book features rich photography, reproductions of tactile pages embossed from vintage printing plates, and an accessible audio book version on CD read by APH narrator Jack Fox. This 180-page hardbound book was designed by nationally recognized graphic artist Julius Friedman and features color photography by Geoffrey Carr.

Braille Edition:
Two hardbound braille volumes with color covers contain the text of the regular print edition, including the pages embossed from vintage APH printing plates. Pages are bound with metal rings and a cloth page marking strip is bound into each volume. The CD containing the audio book version, narrated by Jack Fox, is included.

Not available with Quota funds.

APH Partners with Dolly Parton to Create a New "Community" for Families Interested in Early Literacy

The **American Printing House for the Blind** and the **Dollywood Foundation** have formed a partnership that expands **Dolly Parton's Imagination Library**!

This partnership allows APH to offer a growing collection of professionally-narrated children's books as free audio file downloads for sharing the reading experience with blind and visually impaired children under kindergarten age.

Soon there will be a procedure allowing eligible families to receive their own Imagination Library print/braille books. Such families might include young children who are blind and/or parents who are blind.

For more information, please visit **www.aph.org/dpil/** or simply click on Dolly's picture on the APH website.

APH Information for Families

Having a child who is visually impaired or blind may be a challenging experience; however, you're not alone! There are dozens of agencies in your state and across the country to help you provide your child with the best education and rehabilitation services possible.

See the **Resources** section on **page 93**.

What Is the Federal Quota Program?

The federal Act to Promote the Education of the Blind provides funds for accessible educational materials for eligible students who meet the definition of blindness. **These federal funds are available to organizations in each state to provide materials for students working at less than college level.** The organizations may be state departments of education, residential schools, or agencies for the blind.

Who is Eligible?

In order for students to be eligible for registration in the Federal Quota Program they MUST meet these requirements:

- meet the definition of blindness – "central visual acuity of 20/200 or less in the better eye with best correction; a peripheral field so contracted that the widest diameter of such field subtends an angular distance no greater than 20 degrees; or visual performance reduced by a brain injury or dysfunction when visual function meets the definition of blindness as determined by an eye care specialist or neurologist."
- "be enrolled in a formally organized public or private, nonprofit educational program of less than college level"
- be enrolled with the registering school or agency on the first Monday in January

How Does the Quota Program Work?

A national census taken each January by APH determines the number of students eligible to receive materials purchased from APH using Federal Quota funds. The federal money allotted for Quota each year is then divided among the participating schools and agencies based on the number of students registered. The money does not go to the students themselves, but is credited to Federal Quota accounts administered by Ex Officio Trustees who oversee the funds for their school or agency. The Trustee decides which APH products to purchase with Quota money to best serve all visually impaired students in their system.

Who Are the Ex Officio Trustees?

Each organization participating in the Federal Quota Program has a designated Ex Officio Trustee entrusted with administering the program within his or her system. Each state, and territory, and possession of the U.S. has at least one Ex Officio Trustee.

Is My Student Registered for Federal Quota?

There are several ways to find out if your student is registered.

- Ask at your Individualized Educational Program (IEP) or Individualized Family Services Plan (IFSP) meeting. Your service provider should be aware that Federal Quota funds are available, and can tell you if your student qualifies.
- Contact the state department of education (if your student attends a public or private school) or the state residential school for the blind.
- Contact your Ex Officio Trustee for more information. To learn the name of the Ex Officio Trustee serving your area, check: **www.aph.org/fedquotpgm/trustees.html** and then click on your state, or contact the APH Field Services Department at **800-223-1839**, extension **257**.
